

Dr. Friedman has a unique practice. He is an experienced, board-certified endocrinologist and researcher, he has the capabilities to diagnose and treat even the most difficult hormonal problems. He is compassionate, a good listener and willing to “think outside the box”. He cannot diagnose or treat patients without first seeing them in his Los Angeles Clinic and is unable to respond personally to patients looking for doctors in their area. He strongly recommends patients with hard to diagnose or treat pituitary, thyroid or adrenal disorders to make an appointment to see him by phoning us at (310) 335-0327 or sending us an E-mail to appointments@goodhormonehealth.com

However, he recognizes that some patients are unable to travel to Los Angeles to see him. Therefore, he has compiled this list of physicians around the world that might be appropriate for patients to see. Dr. Friedman has trained with some of these physicians and others he has met at meetings. Good luck in achieving good hormone health.
